NOTIFICATION OF EXCAVATION IN INDIVIDUAL HAZARDOUS SUBSTANCE SITES (IHSSs) - RLB-0765-92

Pursuant to the Environmental Assessment for Construction Activity requirements, it is necessary to inform the Environmental Protection Agency (EPA) and the Colorado Department of Health (CDH) of excavations taking place within IHSSs. Please provide EPA and CDH the following information.

There are three soil classification surveys specified in the Operable Unit No. 6 (OU 6) Work Plan. Each of these requires the excavation of a shallow trench. Two of these surveys will be relocated. Soil classification surveys will be relocated from IHSS 166 to IHSS 216.1, and from IHSS 167.1 to 167.3. The soil classification survey specified within IHSS 165 will remain at that location.

The reason for the relocation is that IHSS 166 contains backfilled trenches, not native undisturbed soil. The new location in IHSSs 216.1 is an area of undisturbed soil. Relocating the survey from IHSS 167.1 to IHSS 167.3 will provide a better spacial distribution of soil classification within OU 6. These locations will also complement the side-wide soil classification effort.

If you have any questions or require further information, please call P. J. Laurin of Remediation Project Management at extension 8702.
